**DETAILED ACTION**

1. Claims 23, 25-27 and 29-50 are pending in this application.

***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The claim limitations of the metal atom precursor being a metal salt which is a silver halide (see claims 33 and 34 for example) does not have proper antecedent basis in the originally filed specification, it is present in original claims 2 and 3.

***Claim Rejections - 35 USC § 112***

3. Claims 35, 36, 39, 45, 46 and 49 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 35, 36, 45 and 46 recite

Art Unit: 1756

pattern widths which are not taught by the originally filed specification.

Claims 39 and 49 recite aspect ratios of the conductive pattern which are not taught by the originally filed specification. The specification teaches an aspect ratio of about 5 for the pattern made using the mask not the aspect ratio of the conductive pattern.

***Allowable Subject Matter***

4. Claims 23, 25-27, 29-34, 37, 38, 40-44, 47, 48 and 50 are allowed.

***Conclusion***
